

General information about medical organization

The state budgetary institution of Vladimir region “Vladimir City Hospital №2” is a multispecialty health care organization situated in Vladimir city. The structure of the institution includes inpatient facility, children’s and adults’ clinics, antenatal care clinic and paraclinical departments. The clinics of the health care institution serve for more than 60 thousand people of the region centre including about 12 thousands of children.

Round the clock medical care is offered in internal medicine, pulmonology and gynecology departments as well as in two children’s infectious disease departments and in children’s tuberculosis department. Children’s infectious disease departments are the only ones in the city of Vladimir and children’s tuberculosis department is the only one in the entire region. The institution hosts the only gynecologic department in the city which provides planned medical care according to its specialization.

Medical treatment as well as outpatient and inpatient care are provided in therapy, pulmonology and gynecology in conditions of the day care hospital for therapeutic and diagnostic measures in case of diseases and conditions which do not require round the clock observation and care.

There are more than 120 doctors working in the health care institution, including one Honored Doctor of the Russian Federation and nine employees rewarded for excellence in health protection. More than 70% of medical and nursing staff of the institution have higher qualifying category according to their specialty. Three doctors serve as the chief experts for the Department of Health in Vladimir region on coloproctology, children’s phthisiology and epidemiology.

The medical institution has resources which make possible to provide primary health care and special medical care in needed amount and quality, has capabilities for research using the modern methods of radiology, ultrasound, functional and laboratory diagnostics.
